RESEARCH INTERESTS

Networked Systems, Social Computing, Privacy, Sensing, IoT

ACADEMIC APPOINTMENTS

EECS School, Queen Mary, University of London, UK

Oct 2011 - now

Senior Lecturer in Digital Media

- I perform research in issues around user behaviour analytics using machine learning, personal data, large-scale social sensing systems, networks and systems, alongside normal undergraduate and postgraduate supervision, administration and teaching duties in the School of Electronics Engineering and Computer Science, QMUL. I lead the Social Computing and Health themes within the Cognitive Science research group and the Centre for Intelligent Sensing.

Social Computing Group, Qatar Computing Research Institute, May 2014 - Dec 2015

Research Scientist in Social Health Analytics

- I initiated the Social Health Analytics theme on the use of wearable devices, smartphone apps, and social media to provide personalised interventions for better health, understanding individuals' interaction with their data, and the effect of their social network on their health behaviour. I lead a number of collaboration between QCRI and Qatar hospitals on diabetes, sleep disorders, and childhood obesity.

Royal Veterinary College, University of London/Department of Pharmacology, University of Cambridge, UK

Jan 2010 - Sep 2011

Postdoctoral Research Fellow

- I joined RVC to work with Professor Stephen Hailes of UCL Computer Science, Professor Alan Wilson, the head of RVC Structure and Motion Laboratory, and Professor Jenny Morton at the Department of Pharmacology, University of Cambridge. I worked on measuring cognitive, locomotor, social dynamics and behavioural functions in a transgenic sheep model of Huntington's Disease, using multi-sensory custom devices for large-scale monitoring, the results of which appeared on high impact journals such as Current Biology, and popular press such the BBC and the Science magazine.

Max Planck Institute for Software Systems, Germany

Jan 2009 - Dec 2009

Postdoctoral Researcher

- I joined as the first researcher in MPI-SWS at the new location in Kaiserslautern with Professor Paul Francis. I worked primarily on development of a privacy-aware advertisement system and new applications and possibilities for personalised advertisement. This work resulted in a US patent application, as well as a number of scientific publication. I also collaborated on a project with Dr Krishna Gummadi on analysis of competition between social networks and traditional mass media on information propagation which lead to articles in NYTimes and an ICWSM paper.

EDUCATION

University College London/University of Cambridge, UK, October 2004 - October 2008

PhD Thesis: Topological Characteristics of IP Networks

- Scholarship and fees awarded by EPSRC.

- I worked on developing sampling algorithms for inference of information from high-speed Internet links and to explore the topology modelling and failure issues on networks from an enterprise/corporate perspective. During my PhD I moved to Churchill College, Cambridge, to join the Computer Laboratory, University of Cambridge.

University College London, London, UK, October 2003 - September 2004

MSc Telecommunications Industry, Distinction

- Scholarship and fees awarded by EPSRC.
- As my MSc project I developed a commercialised operating system for sensor networks and performed extensive performance analysis for these devices.

University College London, London, UK, October 1999 - June 2003

BEng (Honours) Electronics & Electrical Engineering

- Fees awarded by UCL Scholarship and Sony Europe
- As my final year project, I built a stand-alone RDS encoder for the UCL radio station.

London business School (part time), London, UK, January 2005 - April 2006

MBA Elective modules

- Attendance sponsored by CSEL, UCL.
- I was elected out of a high number of candidates to study few MBA electives at LBS: Finance and Value Creation, New Communications Industry, Technology Strategy

INDUSTRIAL
EXPERIENCE,
PLACEMENTS AND
EXTENDED
RESEARCH VISITS

AT&T Labs, Research, USA Jun 2012 - August 2013

Visiting Data Scientist

- I spent the summers of 2012 and 2013 with Dr Walter Willinger & Dr Aman Shaikh on the interaction between external network events and internal traffic engineering in AT&T backbone network.

TRC Mathematical Modelling, University of Adelaide, Australia Mar 2008 - May 2008

Visiting Researcher

- I worked with Dr Olaf Maennel and Dr Matthew Roughan on the spreading of routing information in the Internet. We analysed a large collection of traces collected by the RouteViews project in order to understand the nature of update propagations in the BGP protocol. This work contributed directly to my dissertation and an international conference publication.

Intel Research Cambridge, UK Sep 2005 - Jan 2006

Research Intern

- I joined Intel Research as my first internship during my PhD. In this work with Dr Gianluca Iannaccone I focused on detecting the root cause of distributed failures and events on the Internet and finding the weak points of the network topology. This work resulted in a journal publication, an extended abstract in SIGCOMM 2007 and provided the direction of my PhD thesis.

Senceive, UK Jun 2003 - Sep 2004

System Engineer

- Senceive is a technology spin-out from University College London focusing on wireless sensor

networks. I joined Senceive as their first employee and developed the operating systems and applications for environmental monitoring. I continued working at Senceive while I was an MSc student at UCL. The technology is being used for environmental monitoring in data centres and on Network Rail.

Sony Europe, UK

Jun 2001 - Sep 2002

Embedded Systems Engineer

- I worked in the Embedded systems Hardware Group in Sony Europe for two summer internships. In this work I worked on programming a test harness for the analysis of protocol and signal stability of the on-chip communications in mobile phones.
